PROJECTS

Hostel Management System | HTML, CSS, Bootstrap, ExpressJS, MongoDB

- Developed a web application to automate hostel operations, including real-time queries, noticeboard updates, student profile management, leave request handling, and complaint submissions.
- Implemented features for managing student profiles, handling leave requests, and tracking complaints, streamlining administrative tasks and improving communication.
- Designed an intuitive interface for users to interact with various functionalities, ensuring ease of use for both hostel staff and students.
- Enhanced operational efficiency through automation, reducing manual effort and improving overall management of hostel activities.

ToDo Planner App | React, Express, MongoDB, Tailwind CSS

- Developed a web application to streamline task management with features for task addition, deletion, status updates, and deadline management.
- Implemented a user-friendly interface using React for the frontend and Tailwind CSS for styling, ensuring an intuitive and responsive design.
- Utilized Express for backend operations and MongoDB for data storage, providing a robust and scalable solution.
- Enhanced task organization and efficiency, helping users manage their tasks effectively and stay on top of deadlines.
